Profile

Multidisciplinary Visual Arts undergraduate at the University of British Columbia with a focus on Human-Computer Interaction through Computer Science coursework. Experience in interactive art, UI/UX, XR experiences, and creative technology. I combine artistic practice with technical workflows, and collaborate with artists, designers, and developers to transform creative concepts into engaging interactive experiences. Passionate for experimenting and bridging art and technology.

Education

Bachelor of Arts, Major in **Visual Arts** - University of British Columbia

Sept 2023 - May 2027

Visual Arts: Digital Arts, Creative Technologies & Interactive Installations, Painting, Drawing, Print making.

Computer Science: Software Construction, Human-Computer Interaction Methods, Models of Computation, Computation, Programs, and Programming.

Skills & Certificates

Design & Prototyping:

Figma, Figma Make,
Adobe Creative Suite,
HTML/CSS,
3D Model, Print, Scan
Traditional art mediums.

Programming & Development:

Python, JavaScript, C++,
Git, Perforce
AI Fluency: Framework &
Foundations.

Interactive & Creative Technology:

Touchdesigner,
Arduino,
Blender,
UE5,
Sensors and Interactive Systems.

Languages:

English,
Mandarin,
Shanghainese,
Spanish (A2).

Work Experience

UI/UX designer

Emerging Media Lab | Vancouver, BC

May 2025 - May 2026

Designed user experiences and interactive interfaces for research-driven XR and web applications, collaborating with interdisciplinary teams of researchers, developers, and artists to improve design workflows from concept to implementation.

Procedural Poetry Funhouse (Virtual Reality)

- Design and build the visual layout, environment, interaction workflows, user flows, and interface prototypes for a VR educational experience in Unreal Engine 5, shaping player experience through spatial storytelling and play-based learning.
- Collaborate with the Creative Writing department and conducted research on visual poetry and blackout poetry, drawing inspiration from Vancouver poet Judith Copithorne's work to develop visual storytelling approaches.
- Create wireframes and interactive prototypes in Figma, collaborating with developers to implement and iterate.
- Conduct user testing and refine interactions based on feedback, improving usability, and accessibility.
- Optimize VR experience by simplifying environmental assets and visual elements while balancing artistic goals, technical constraints, and real-time performance.
- Created an interactive UI cat integrated with an LLM to act as a UI guide; modeled, textured, and animated the cat.

Virtual Soils (Gaussian Splat Visualization Website)

- Design the user experience and interaction workflow for a web-based platform visualizing Gaussian Splat datasets of diverse soil environments.
- Produce user flows, wireframes, and interface prototypes in Figma, blender and UE5 that streamline the design and development workflow across interdisciplinary teams.
- Iterate on interface designs through testing and feedback to improve navigation, accessibility, user experience.

New Media Technical Assistant

UBC AHVA New Media Lab| Vancouver, BC

Sep 2024 - May 2025

Support artists, faculty, and visual arts students in developing interactive installations, digital artworks, and experimental media projects by translating creative concepts into technical workflows and practical solutions.

- Provide technical guidance throughout the creative process, helping artists select appropriate tools, hardware, and software for interactive media projects.
- Assist with rapid prototyping using Arduino, TouchDesigner, Photoshop, Illustrator, web technologies, physical computing, and multimedia systems.
- Support 3D modeling, point-cloud scanning, 3D scanning, and 3D printing workflows, including preparing models and troubleshooting production issues.
- Collaborate with interdisciplinary artists to prototype, test, and refine artworks and interactive experiences.
- Diagnose hardware and software issues, install and calibrate creative technology equipment, and support reliable installation and exhibition performance.
- Bridge communication between artistic vision and technical implementation by helping transform creative ideas into achievable interactive experiences.

Lifeguard & Swim Instructor

City of Surrey

Mar 2023 - Mar 2025

- Lifeguard and Swim Instructor with strong leadership, communication, and problem-solving skills developed through safety-critical environments and personalized instruction.
- Currently certified in Standard First Aid & CPR, National Lifeguard, Lifesaving Society Swim Instructor.

Leadership & Volunteers

President

Visual Arts Student Association (VASA)| UBC

May 2025 - Current

- Led an executive team to support the Visual Arts student community through exhibitions, workshops, social events, and creative initiatives.
- Manage team coordination, project planning, and event logistics, ensuring successful execution of community programs.
- Design visual communications, promotional materials, and digital content to increase student engagement and promote VASA activities.
- Collaborate with students, faculty, and campus organizations to create opportunities for artists to share their work and connect with the creative community.
- Serve as a liaison between Visual Arts students and faculty members, collaborating with Visual Arts and Art History faculty and staff to strengthen student engagement and improve community experiences.

ACM SIGGRAPH SV

Siggraph 2025| Vancouver, BC

August 2025

- Support conference operations and engaged with emerging technologies and interdisciplinary practices across computer graphics, animation, visual effects, and interactive media.

Gallery Attendant

Vancouver Art Gallery| Vancouver, BC

October 2021 - May 2022

- Supported daily gallery operations and visitor experiences for *Yoko Ono: Growing Freedom*, a major contemporary art exhibition.

Founder & President

New View Times, New Media Club of Grandview Heights Secondary| Surrey, BC

September 2021 - June 2023

- Found and led a student-led new media club focused on exploring digital creativity, visual communication, and new media.
- Organize weekly meetings, manage project timelines, and delegate responsibilities across creative teams.
- Establish a collaborative environment where students could explore photography, digital media, design, and creative projects.
- Direct the production and publication of student magazines, overseeing content planning, visual design, editing, and team coordination.
- Encourage students to experiment with new creative tools and develop independent artistic projects.

RE: Application for UI/UX designer at RBC

Dear RBC Digital Design Recruitment Team,

I am excited to apply for the Winter 2027 Digital Design Co-op position at RBC, with my preferred placement being Interaction Designer. As a Visual Arts student at the University of British Columbia with a minor in Computer Science and a background in Human-Computer Interaction, I am passionate about creating intuitive digital experiences that bring together design, technology, and an understanding of people.

In my previous role as a UI/UX Designer at UBC's Emerging Media Lab, I collaborated with researchers, developers, and other designers to create interactive digital experiences. I worked extensively in Figma and contributed to user-centered design processes, from developing interface concepts and prototypes to refining experiences based on technical constraints and user needs. This experience taught me how to communicate across disciplines and turn complex ideas into clear, accessible, and engaging interactions.

My interdisciplinary background also allows me to approach design problems from both creative and technical perspectives. Through my coursework and personal projects, I have worked with tools including Figma, Adobe Creative Suite, HTML/CSS/JavaScript, Blender, Unreal Engine, and TouchDesigner. I enjoy learning new technologies and exploring how they can support better user experiences. Whether designing an interface, building an interactive prototype, or working with emerging technologies such as VR, I am motivated by the process of understanding a problem and iterating toward a thoughtful solution.

I am particularly drawn to RBC's Digital Design team because of the opportunity to work on digital experiences that serve a broad range of clients and have a meaningful impact at scale. I would be excited to learn from experienced designers while contributing my visual design skills, technical curiosity, and collaborative mindset to an agile, multidisciplinary team.

Thank you for considering my application. I would welcome the opportunity to contribute to RBC as an Interaction Designer and continue developing my skills in user-centered digital design.

Sincerely,

Amy Yiqin Li
